

Career programs offers many alternatives for students to immerse themselves in the world of work. They are broken down into required and optional components as follows:

**Career Programs
(Required)**

**Career Programs
(Optional)**

Work Experience 12

The community becomes the classroom where students gain experience in the workplace and are provided with a frame of reference to review or revise their career goals. Through both teacher and employer assessment, students receive valuable feedback about their employability skills and technical skills related to specific occupations.

Work experience is comprised of pre-placement classroom activities combined with 90 hours at a community worksite.

All Work Experience Programs require Planning 10, Work Experience 12 plus 4 other courses: at least two of which are at the Grade 12 level.

Please refer to the following pages to see which courses can be used to fulfill each Work Experience area requirements.

Business and Applied Finance

(Careers include accountant, auditor, investment analyst, marketing specialist, realtor, administrative support clerk, medical secretary, purchasing agent, insurance agent, business owner, stockbroker, economist, high school business education teacher, etc.)

Secondary School Apprenticeship and Career Technical Consortium

Secondary School Apprenticeship

Secondary School Apprenticeship (SSA) offers students over the age of 15 an opportunity to begin an apprenticeship while still in school. The most challenging requirement to become a secondary school apprentice is finding employment in the trades. The employer must be willing to sponsor the student and have a certified tradesperson willing to oversee the student's training.

Advantages of SSA include:

- Earn while you learn!
- four credits for each 120 hours of paid employment (up to a maximum of 16 credits for 480 hours)
- registration as an apprentice with the Industry Training Authority
- opportunity to access practical training in areas outside secondary curriculum
- potential for \$1 000 scholarship upon graduation.

For a complete list of trades, visit www.itabc.ca. To register as an SSA student, see the Apprenticeship Facilitator.

Accelerated Credit Enrollment in Industry Training (ACE IT)

Grade 11 or 12 students who are interested in entry-level trades training may wish to consider applying for District ACE IT programs. Most programs are dual credit and offered in partnership with post-secondary institutions. Completed packages must be submitted to the District Career Development Office by the application deadline – March 30 each year.

The Career Advisor and Counselors can assist with additional information on application procedures.

Please refer to the District Career Programs Chart for information on the many options available. This can be accessed at <http://www.deltasd.bc.ca/nd/careers.html>

Career Technical Consortium (CTC)

Senior students may apply to participate in dual-credit programs offered at Kwantlen Polytechnic University. Seats in programs are limited. Candidates must submit a detailed application and pass a screening interview.

Drafting

Kwantlen Polytechnic University offers Grade 11 and 12 students the opportunity to get a head-start on the Drafting Citation. Four courses are offered on a rotating basis over a two-year period. Students accepted to the program attend the Cloverdale campus two evenings per week from 4:00 – 6:30 pm. As seats in the program are limited, completion of the District Career Programs Application and Interview do not guarantee entry to the program.

For additional information or a program brochure see your Drafting Teacher or Career Advisor.

Grade 12 Enhancement

Under a partnership agreement with the Delta School District, Kwantlen Polytechnic University has devoted 24 seats at the Richmond and Surrey campuses to Grade 12 students. Students may begin post secondary academic studies while completing secondary graduation requirements. Courses which are completed successfully are eligible for dual credit as elective courses in the graduation program. ***Students are responsible for tuition costs and related course costs.***

All course applications must be approved by the Dean of the respective department. A maximum of two students per course, students are limited to one course per semester. Application deadlines are June 15 for Fall semester and October 15 for Spring semester. The Career Advisor has application packages and will assist students with the registration process.
